August 15th, 2022

Greetings,

Every year the CP Police Service partners with Operation Lifesaver, the rail industry, government, first responders, educational institutions, and community groups to highlight safe practices around railway property.

We are sending you this USB, which contains Rail Safety presentations, videos and information created in collaboration with CP Rail, CP Police Service, and Operation Lifesaver.

Included in this USB drive is a Rail Safety Video produced by the CP Police Service. This video is a great resource to use in place of in-person presentations. The contents also include links, interactive games, activities and resources.

CP Police Service members and Operation Lifesaver Safety Ambassadors may also be available to do in-person or virtual rail-safety presentations for your group or community. We ask that you take these materials and deliver them to your audience throughout the year, especially during **National Rail Safety Week this year, September 19-25, 2022**. Become Ambassadors yourselves and join our team in sharing rail safety.

Many additional resources can be found from CP at (<https://www.cpr.ca/en/safety/railsense>) and Operation Lifesaver Canada (<https://www.operationlifesaver.ca/>). Both links contain interactive activities and educational videos, including first-person recollections and impacts on rail-related incidents. Real-life experiences are shared along with virtual-reality simulations.

We believe that your support in delivering these valuable materials will profoundly impact those within the communities we live, work and serve. The materials are available in both French and English.

If you need further support or wish to make additional requests or inquiries, please contact CP Community Connect at <https://www.cpr.ca/en/contact-us/community-connect>.

Thank you for helping CP and CP Police to achieve its mission to STOP Track Tragedies and educate everyone to become safer around the tracks.

Respectfully,

Al Sauve, O.O.M.
Chief of Police, Canadian Pacific Police Service
