

Course Title: Science 10

Credits: 4

Description: Science 10 is an online, media-rich course designed to meet the new BC Curriculum. The course offers interactive lessons, a variety of guided activities, assignments, projects and unit tests.

Big Ideas (Units):

- Biology: DNA is the basis for the diversity of living things.
- Chemistry: Energy change is required as atoms rearrange in chemical processes.
- Physics: Energy is conserved, and its transformation can affect living things and the environment.
- Astronomy: The formation of the universe can be explained by the big bang theory.

Recommended Prerequisites: Science 9

Resources:

Online course materials are provided. Personal computer and internet connection are required (not supplied by SAIL). Please note online course platform is not fully compatible with tablets or smartphones.
