- Device should be assigned to specific student - traceable content for follow up if needed.

🌱 **Snap Chat/Social Media - Technology at Home**

- Parents need to monitor/restrict/have open dialogue with their children about tech usage, educate themselves on the dangers of specific apps. ie. Snapchat/ Discord. Remind children that they control their digital space. Delete, unfriend or block are options that should be used in unhealthy conversations.

- Consistent conversations necessary as kids grow and have more access to social media. Group chats can be highly dangerous and out of control. Online predators can add themselves to chat threads and pose as kids using names that sound familiar.
- Kids don't understand the implications of certain emojis or photo sharing
- Digital Responsibility becoming very important - BCCPAC has a lot of resources [Raising Digitally Responsible Youth - A Parent's Guide](#)
- Sheri will share her key points PDF with Karen from ERASE workshop - info on Digital Tattoos/Snapchat/Instagram
- Parent should have an open dialogue with other parents about this topic, pass on any information/share resources that can help protect our children - Learn/know the platforms and how to navigate them
- Outside sources have come in to speak to higher grades (RCMP and SAFE SCHOOLS) about online safety, look into having them come again, perhaps speak to all students?
- Look into having the RCMP do a parent session, our Constable has a background as a childcare worker and has an understanding of relating to kids
- Fraser Health and Canadian Pediatric Society offer workshops on Mental Health and the link to addictions starting with social media. Process addiction starts with "likes" on social media - can lead to future addiction. 3M Model - Model, Monitor, Manage (Maulik)
- Research showing that 'Reels' potentially re-wiring young brains to need constant stimulation, affecting impulsivity, lowering attention spans (Nina)
