

NORTH SURREY

S e c o n d a r y S c h o o l

Dear Parent/Guardian of Current Grade 7 Students,

My name is Mr. JB Mahli and I am the proud principal of North Surrey Secondary. We are excited to begin the new year planning for our future Spartans. Although it is February, the next few months will fly by and before you know it September will be here. Grade 7 students are enjoying their last year of elementary school and we are looking forward to welcoming them soon. The first two years of high school are designed for students to acquire a deeper understanding of a variety of learning areas and to begin to explore the Arts and Applied Design Skills and Technology (ADST) modules. We refer to our grade 8 and 9 years as the Exploration Years at North Surrey. After grade 9 students enter the Graduation Years and begin to refine their learning pathways as they approach graduation.

Beginning high school can feel overwhelming but our hope is to provide you with a timeline (backside of this letter) of the various steps and opportunities to connect with our staff here at the school prior to September. Many of you might have children currently attending North Surrey or have students that are part of our alumni, or this might be the first time you attend our school. Regardless, we are excited to begin the learning journey with you. Below you will find a timeline and a description of what you can expect at each step along the way.

North Surrey Secondary Exploration Years 2022-2023

The Exploration Years (Grades 8 & 9) provide students an opportunity to explore a variety of learning areas to help prepare them for different pathways, interests and passions as they approach the Graduation Years (Grades 10-12).

Courses are grouped into Learning Areas, as they share many of the same curricular competencies described in the [Ministry of Education Curriculum](#); however, students will be scheduled into courses across learning areas in a semester system.

Humanities 8 and 9 is a yearlong course and provides an opportunity for students to build positive relationships and a strong foundation in the Exploration Years. Check [Learning Guide 2022](#) for descriptions of courses in all Learning Areas. Students will receive the following courses (checks) and choose from the circles.
