

Batteries are banned from the landfill and therefore Surrey Schools has developed a process for recycling of batteries that are generated through the course of business.

- Please place this bin in a visible spot in the office where it is easily accessible to transportation
- Bin is for recycling batteries that were used in the school/workplace
- Both single use and rechargeable batteries can be recycled
- Transportation will check for and pick up batteries on an as needed basis
- Batteries will be taken to the District Facilities Centre for recycling
- Batteries from district issued electronics (e.g. cell phones, laptops) should be recycled through IMS, not through this bin.
- Bin is not intended to recycle batteries staff bring in from home or school battery drives. Locations for personal or community battery recycling can be found at www.call2recycle.ca/locator
