INTER-A 8-12

Students entering grade 8 are encouraged to apply to the Inter-A Program. The program provides opportunities for high school students to participate in collaborative learning, community volunteering, and leadership development. Students are often attracted to Inter-A because of its emphasis on creativity, teamwork, and public speaking. Although students in the program will take all their academic classes with the other students in the Inter-A program, sometimes in multiage classrooms, they are still very much a part of the Queen Elizabeth Secondary family. The program currently admits students into grade 8 for a two-year program. Students may also apply for admission into the grade 10-12 program.

2022 KINDERGARTEN LOTTERY PROGRAMS

FRENCH IMMERSION

French Immersion is a research based French language learning program available to all students. It is designed for non-French speaking students who wish to attain a high level of proficiency in both official languages. Surrey offers two programs: Early Immersion starting in Kindergarten, or Late Immersion starting in Grade 6. Students are immersed in the French language within the classroom where French is used for meaningful communication and for instruction in all subject areas. French Immersion students develop strong communication skills in both French and English. They also develop a knowledge and understanding about the structure of language that may enable them to learn other languages more easily. French Immersion goals are:

- to produce students who are able to understand and communicate in French and English and achieve a level of learning in all subject areas equivalent to that achieved in the English program.
- to allow students to develop linguistic and cultural knowledge of both Canada's official languages that supports a spirit of positive appreciation and respect.
- to foster intellectual, physical, emotional, social and creative development of children.
- to develop awareness, appreciation, respect and understanding of the French and English cultures and values.
- to enable students to pursue further education and careers in either or both languages.

French is one of Canada's two official languages. It is also a "world" language because of its geographical distribution on the planet: French is spoken in five continents and is a language shared by more than 45 countries. Since we live in an increasingly global society, the acquisition of French is proven to be an asset for the future.

MONTESSORI

The Montessori program is intended to develop self-directed students with a global vision. In the Montessori classroom there is a multi-age group in each class, ideally a three year age span, with six to nine year olds grouped together and nine to twelve year olds in another group. Wherever possible, students stay together for three years. The program is individualized wherever practical. An emphasis is placed on students progressing at their own rate. At the Primary level, the method is based on the use of self-correcting, concrete materials, which are devised to be used in a sequence matched to the child's level. Materials are limited so that children learn to share and help one another. There are large unbroken time spans for work, with a minimum of interruptions to disturb the student's concentration. The curriculum is designed to develop in the child a global view of humankind, stressing the interdependence of people and the care of the environment. There is an emphasis on the development of the child as a contributing member of the society, including a multicultural focus.

TRADITIONAL

While each Traditional School is unique, we all share the common values of citizenship, responsibility, respect and academic excellence. We uphold a crested uniform dress code and offer current, effective research-based teaching practices that support all learners to achieve their highest potential. We believe that students maximize their individual achievement when high standards and expectations are reinforced both at school and at home. Behavioural expectations, clearly defined and communicated in a school code of conduct, create an environment in which students act in a respectful and responsible manner. We believe that the goals of the school community are best met when parental support is welcomed and the PAC and school work closely together. An engaged parent community is the hallmark of each Traditional School.

INTENSIVE FINE ARTS

The BC Curriculum Goals and Rationale states, in part: "A strong arts education benefits all students, communities, and societies by contributing to the development of well-rounded, educated citizens. ... Arts education ... stimulates students' imaginations, innovation, creativity, and sense of well-being while developing competencies useful to students' education and careers."

The Arts Education curriculum is founded on the artistic habits of mind – exploring and creating, reasoning and reflecting, communicating and documenting, and connecting and expanding. All are lifelong and transferable knowledge and skills.

While the development of artistic habits of mind and learning in all four areas of the arts (dance, drama, music, visual art) are part of the curriculum for all students, in the Intensive Arts Education choice program there is a particular emphasis on learning through the arts. A concerted effort is made to:

- go deeper in skill and knowledge development;
- encourage students to demonstrate their learning through the arts;
- use the arts as a lens for exploration of other curricular areas.

In the Intensive Fine Arts Education program the arts are not seen as one part of the curriculum; **they are the lens through which the curriculum is explored.** We create learning environments where in-depth experience with the arts becomes a fundamental way of knowing.
