F. Training Documentation

Date of Training / Review	Name of Trainer

G. Procedures to deal with a problem: - Allergies / Anaphylaxis

If you see symptoms of a severe allergic reaction or know that a child has eaten something they are allergic to:

1. Administer the EpiPen® – Don't hesitate. It can be life saving.
   - i. Pull off grey safety cap 
   - ii. Push black tip into outer thigh
     If necessary may be done through light or single layer of clothing (no thicker than jeans)
   - iii. Listen for a "Click". Hold for 10 seconds. Remove and discard.    - iv. <u>If symptoms persist or recur</u>, a second dose can be administered in 10 to 20 minutes. *(maximum 3 doses).*
2. Have someone call 911. Tell them that a student has had an anaphylactic reaction.
   <u>Give them:</u> Name and address of school (use 911 protocol).
3. The student should rest quietly. DO NOT SEND THE CHILD TO THE OFFICE.
4. Help the student to remain calm and to breathe normally. An adult must stay with the student.
5. Call the parents/guardians/emergency contact.
6. Observe and monitor the student until the ambulance arrives.
