Safe, reliable information at your fingertips

The Internet is a wealth of information, but not all of the content is reliable or accurate. The Surrey School District provides a complete suite of online digital resources to support learning and teaching. Licensed through the Educational Resource Acquisition Consortium (ERAC), the online materials are safe, appropriate, reliable, current and searchable.

Formats include:

eBooks • Magazines • Video streaming • Images • Articles

Features:

Many resources are provided in multiple languages and learning levels and some have the increased functionality of being read aloud for the learner.

Resources for every learner.

The needs of elementary and secondary students vary. There are digital resources to support learners of all ages and abilities, and align with the revised BC Curriculum.

Access:

These digital resources are available to students, families, teachers, and other district staff anywhere, anytime.
