

### *School Enrollment*

Our school currently has 2095 students registered and is on track to have approximately 2200 students registered next year. We are a large and growing school and continue to work with students, families, and the District to make sure we do all that we can to best support student learning and achievement.

### *2026/2027 Student Fee Schedule*

A draft copy of the 2026/2027 student fee schedule is being shared with the PAC today. The formatting has been adjusted to align with a new District standard template, which is intended to make the student activity fee, along with enhancement fees, clear and understandable. The fees themselves are, for the most part, closely aligned with the current school year's fees. A final copy of the fee schedule will be published by the end of May.

### *Student Learning Surveys*

Over the past few weeks, students in grades 10-12, parents, and guardians have received information related to our 2025/2026 Student Learning Surveys. We encourage as many people to complete these surveys as possible to provide the school, District, and Ministry of Education and Child Care with information about what is going well at Sullivan Heights, as well as what needs work. We appreciate the time, care, and attention put into these surveys.

### *Extended Absences*

Regular attendance plays a critical role in student learning, connection, and overall success. While some absences are necessary due to illness, family circumstances, or other important reasons, extended time away from school inevitably impacts learning continuity and progress. Our staff make every reasonable effort to support students during absences, but instruction, assessment, and classroom experiences cannot be fully replicated outside the school setting. For this reason, it's important to acknowledge that students and families are ultimately responsible for managing the learning consequences that result from missed instructional time. We appreciate your partnership in helping students attend consistently and remain engaged in their learning whenever possible.
