

The Board of Education of School District No. 036 (Surrey)

Pay transparency report

Surrey Schools is committed to creating a workplace where employees receive equal pay for equal work, regardless of their gender or other identity factors. Gender data used in this report was collected on a voluntary basis through an employee survey and a significant portion of employees (99%) responded with “prefer not to answer” or did not respond to the survey. Individuals who did not respond to the survey have been categorized as “Prefer not to say/Unknown”. The following report reflects gender information for only 1% of the employees invited to participate and, as a result, the ability to draw conclusions about gender pay gap is limited. This is the first year Surrey Schools has compiled the pay transparency report. The report will be prepared annually, and Surrey Schools will continue to work on data collection methods to enhance our understanding of pay equity in the organization. In addition, the school district will continue its ongoing practice of reviewing employee compensation and district compensation practices to address pay equity for new and existing positions.
