

We Need Your Help

The contractors working on our building are on site most Saturdays. For the past few weekend they have noticed several individuals using our field area as a driving range! They have also found golf balls on the roof. I understand that it is a nice big area however, our new siding is going to be damaged very quickly if this continues.

If you see anyone “golfing” on the school property or if you are, I respectful request you do not continue. Changing the direction of teeing off will not help as it will only serve to damage Greenside Estates properties.

Thank you for your help.
